## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature recited in claim 1 is a recombinant fusion peptabody, which binds to epidermal growth factor receptor. In view of this Houimel, et al. (International Journal of Cancer, 2001. vol 92:748-755) reads on the claim. Houimel et al. teach a fusion peptabody which binds to the epidermal growth factor receptor consisting of a portion of the human cartilage oligomeric matrix protein, a hinge region and an epidermal growth factor receptor ligand. Therefore, the technical feature recited in claim 1 is not special. Accordingly the groups are not so linked as to form a single general concept under rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 4-10, 12, 17, 28-30, 41-47, and 49, drawn to a recombinant fusion peptabody, which binds to epidermal growth factor receptor.

Group II, claim(s) 13-16, and 48, drawn to a nucleic acid, vector and host cell.

Group III, claim(s) 21, drawn to a method of treating or preventing cancer.

Group IV, claim(s) 23 and 24, drawn to a method of inducing apoptosis.

Group V, claim(s) 25-26, drawn to a method of inhibiting cell proliferation.

Group VI, claim(s) 27, drawn to a method of diagnosing cancer.

Group VII, claim(s) 31-38, drawn to a method of producing a fusion peptabody.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As set forth above, in view of the teaching of Houimel, et al., the groups are not so linked as to form a single general concept under PCT Rule 13.1 because the technical feature of claim 1 is not special.

Groups I and III, IV, V, and VI are related as product and process of use. Their shared technical feature is a recombinant fusion peptabody, but Houimel et al. teaches a recombinant fusion peptabody. Groups I and VII are related as product and method of making. Groups I and II are separate and distinct products.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne M. Gussow whose telephone number is (571) 272-6047. The examiner can normally be reached on Monday - Friday 8:30 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Helms can be reached on (571) 272-0832. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
